Re: Appendix 3 supporting evidence for the whole Policy NE01 Preserving the Gap Between Settlements.

Name and Address: [REDACTED]

To whomever it concerns.

I have lived in Crookham Village for the last 2 and a half years. Initially we moved to get away from the city life after living in London for 12 years. Having grown up in Hampshire we craved the countryside for our young children to grow up in.

With the number of new developments in close vicinity to our home currently being built, I am appalled that there are motions in place to consider even more.

The infrastructure of the village, I believe would be severely damaged. The congestion within the village, especially along Hitches lane along I feel would become grid logged. Another reason I left London to join the peaceful countryside was so that my children could walk safely a village with minimal risk.

There is currently no footpath from Hitches lane running all the way to Dogmersfield school because the local community felt it wasn't in keeping with the village, however, with more and more developments being built it feels as if this mentality may be lost.

Thank you for taking the time to read my objection to yet another settlement.

Mrs Shakiara Valu
