Re: Appendix 3 supporting evidence for the whole Policy NE01 Preserving the Gap Between Settlements.

My reasons for supporting the above is, it has been clear from previous consultations that the Local Gap Policy is very important, not only to the local community, but the wider community as well. The Gap preserves the separate identity of Crookham Village including the unique character of the landscape, which would be completely eroded by even more infill development.

The Gap provides a sense of space, openness and views around the village and ensures that it is different from the urban environment of Fleet and Church Crookham. In this day and age of ever increasing mental health issues, it has a been proven time and time again, how important it is to maintain natural environments to help improve mental problems, and is relevant to any age of person-young and old alike.

This is rural and attractive countryside and forms the correct setting to separate Crookham Village from the surrounding urban development.

Name and Address:

Mrs Susan Emery
