I am writing this in total support of Appendix 3 which is valid evidence for the Local Gap policy.

As a resident of the village I believe it is important that it keeps it's own separate identity and that it's historic linear nature is preserved. The unique character of the landscape in the Local Gaps is important for this and also for local conservation.

I value the unique and diverse landscape and regularly use the local footpaths for dog walks as do many of my neighbours.

It is very clear from previous consultations that the Local Gap is very important to the community and that no one wants Crookham Village to simply become part of a larger conurbation.
