It is imperative that the gaps surrounding Crookham Village are protected.

We use the footpaths regularly around Crookham Village, there is already a changing landscape happening before our eyes with the potential for more, the character of the whole village has changed since we moved here 20 years ago. We really value having this unique landscape right on our doorstep and would be devastated if this were to change.

The rural countryside was one of the main factors for moving to the village, the wildlife that inhabits the fields surrounding the village, and the sense of Crookham Village having its own identity whilst only being a short distance from Fleet itself.
