Anonymous comments will not be accepted. All comments will be publicly available, and identifiable by name and organisation (where applicable) and your name, address and comments will be forwarded to the independent examiner as required by the regulations covering neighbourhood plans. We have received assurance that the data will be kept securely and not used for any other purpose. The examiner will retain the data until we have made the relevant statutory decisions on whether to adopt the plan and the deadline for a Judicial Review has passed, which is six weeks after the decision notice has been published.

If you submit comments they will be published on our website along with your name. If a copy is requested by the relevant Town or Parish Council who prepared the Plan, a redacted copy showing your name and comments will be sent. If you are responding as an individual rather than a company or organisation, we will not publish your address or any details other than your name and comments.

For further details on how your information is used, how we maintain the security of your information and your rights, including how to access information we hold on you and how to complain if you have any concerns about how your personal details are processed, please visit www.hart.gov.uk/privacy .

Please give details of your reasons for support/opposition, or make other comments in the box below, including any specific changes you wish to see to the Plan. Please be as precise as possible.

Policy 5 is unduly restrictive by hampering the planning of large-scale developments which can deliver the supply of new homes and associated infrastructure that the country desperately needs. Furthermore, Elvetham Chase (“the Site”) is sustainably located to a range of facilities available in neighbouring Elvetham Heath.

A 50 dwelling cap seems arbitrary and would be contrary to the NPPF which seeks to “proactively drive and support sustainable economic development to deliver the homes ... that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth” (paragraph 80).

Furthermore Objective 2 also does not accord with paragraph 72 of the NPPF which recognises that “the supply of new homes can sometimes be best achieved through planning for larger scale developments, such as new settlements or significant extensions to existing villages and towns” (our emphasis) (paragraph 72).

Finally, we consider large-scale developments assist with the provision of delivering infrastructure improvements as they provide the required economies of scale needed to fund and deliver them. Such infrastructure improvements will not be delivered through the development of the three sites that have been draft allocated as these often struggle on viability grounds thus will not provide the necessary financial contributions, the required amount of affordable housing and other appropriate community and social infrastructure.

In summary, we suggest the development of sites adjacent to existing settlements is likely to be easier to deliver and make a full contribution to meeting the housing need in an effective and meaningful manner.

The number of dwellings which acts as a cap should be deleted as it is inappropriate to put an arbitrary cap on the number of dwellings that can be delivered on a site that is able to deliver more in a sustainable manner and help contribute to the need for housing.
